Skills

- **Languages**: Java, Python,
- **Frameworks**: TensorFlow, Keras, Scikit Learn, PyTorch
- **Tools/Libraries**: Pandas, NumPy, Matplotlib, Miniconda, Jupyter Notebook, PostgreSQL
- **Soft Skills**: Problem-Solving Skills, Adaptability

Training

Summer Training June 2024 – July 2024

- An intensive training program designed to equip students with in-depth Java programming and software development knowledge. The bootcamp covers fundamental and advance Java concepts, hands-on coding exercises, and real-world applications.
- **Core Java Concepts – Object-Oriented Programming (OOP), Data Structures, Exception Handling, Multithreading.**
- **Advanced Java** – JDBC (Java Database Connectivity), Servlets, JSP (Java Server Pages).
- **Hands-on Projects** – Building web applications, RESTful APIs, and database-driven applications.

Projects

- **Bulldozer Price Prediction:** April 2024
  Designed a ML model predicts sale price of bulldozers, based on previous records of sales.
  Used dataset from Kaggle Bluebook for Bulldozers competition.
  Evaluated this model based on RMSLE metric between actual and predicted price.
  Implemented the project using Conda.
  Tech: Python, Pandas, NumPy, miniconda, Scikit-Learn, Matplotlib

- **The Barrel House- Online Liquor Website**: July 2025
  Developed a fully functional e-commerce platform with user authentication and age restriction.
  Built a custom shopping cart, dynamic product catalog and order management for users.
  Designed responsive, modern UI using Tailwind CSS for smooth user experience.
  Used PostgreSQL for robust data management and tested using PyTest.
  Tech: Python, Django, PostgreSQL, HTML, Tailwind CSS, PyTest.

- **Ice Deposit Detection using Computer Vision**: March 2025
  Developed a Computer Vision pipeline to detect ice deposits in satellite images using OpenCV and scikit-image.
  Engineered a visualization system to highlight detected ice regions with color-coded heatmaps.
  Employed image processing techniques like Gaussian blurring and histogram equalization to enhance image quality.
  Used Otsu's thresholding and Local Binary Patterns (LBP) for robust image segmentation and texture analysis.
  Tech: OpenCV, scikit-image, matplotlib, google colab libraries, NumPy.

Certificates

- Cloud Computing - NPTEL October 2024
- Project based training on Java – Lovely Professional University July 2024

EDUCATION

Lovely Professional University Punjab, India

- Bachelor of Technology - Computer Science and Engineering: ***CGPA: 6.28*** Since September 2022

C.R. International school Rewari, Haryana

- Intermediate; **Percentage:** ***75%*** April 2020 - March 2021

C.R. International School Rewari, Haryana

- Matriculation; **Percentage:** ***92%*** April 2018 - March 2019
